SUMMARY

Frontend Developer with 2 years of experience building scalable web applications using modern JavaScript frameworks. Specialized in performance optimization, reusable component architecture, and multi-environment deployment strategies. Proven track record of delivering high-performance WMS systems and improving user experience through efficient code and thoughtful UI design.

TECHNICAL EXPERTISE

- **Languages**: JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Frameworks**: Vue.js, React.js, Next.js, Angular.
- **UI Libraries**: Material UI, Radix UI, Vuetify, Shadacn UI, Radix-UI,Tailwind CSS, heorUI.
- **Testing**: Jest, Vitest, React Testing Library.
- **state Management**: Pinia, Vuex.Zustand, Redux.
- **Version Control**: Git, GitHub, GitLab, Sourcetree.
- **Build Tools**: Vite, Webpack.
- **Basic Backend**: Node.js, Express, Golang.
- **Databases**: PostgreSQL, SQL Server, MySQL
- **Soft Skills**: Collaboration, Problem Solving, Self-learning, Team Communication, Adaptability

---

WORK EXPERIENCE

Frontend Developer | Smart Reform Plus   Nov 2023 - Present
WMS Web Application Development

- Developed warehouse management systems (WMS) for manufacturing clients using Vue.js, Vuetify, React, and TypeScript with RESTful API integration.
- Built comprehensive WMS modules including inventory tracking, receiving/production/shipment planning, with features such as lot-batch management, Excel export, image upload, and label printing.
- Implemented data tables with advanced filtering, expandable rows, form validation, and JWT authentication across multiple client projects.
- Migrated Windows-based WMS application to modern web platform using React and TypeScript, implementing state management with Redux and Zustand.
- Maintained and enhanced production systems based on ongoing client requirements, adding new features and improving existing functionality.

Technical Environment: Vue.js, React, TypeScript, Material UI, Radix UI, Pinia, Zustand, Jest, Vitest, Vite, GitLab

Contract Programmer | Barsitar IT   Aug 2022 - Mar 2023
LINE ChatBot Development

- Developed logistics chatbot using Golang with LINE Messaging API integration, handling 1000+ daily interactions.
- Built backend services connecting Go applications with PostgreSQL database, implementing RESTful API architecture.
- Enhanced frontend skills through Angular framework development and API integration patterns.

Technical Environment: Golang, Angular, PostgreSQL, LINE Messaging API, RESTful APIs

Programming Intern | Icute Think Beyond   Nov 2021 - Feb 2022
Full-Stack Web Development

- Created CRUD movie applications using Laravel and Vue.js with IMDB API integration.
- Designed and implemented WordPress websites for client projects, ensuring responsive design principles.
- Applied best practices in API integration and database management.

Technical Environment: Laravel, Vue.js, WordPress, IMDB API, MySQL

EDUCATION

Bachelor of Engineering in Computer Engineering   2018 - 2022

Rajamangala University of Technology Lanna, Chiang Mai
- GPA: 3.20
